Revima to provide APU Health Monitoring to Air Serbia

Revima has entered into a Fleet Management Agreement to provide APU Health Monitoring Services for the Pratt & Whitney Canada APS3200 and Honeywell 131-9A APUs installed on A320 family aircraft operated by Air Serbia.

The services include a state of the art Health Monitoring System utilizing advance graphical applications, data analytics and expert knowledge to auto-generate maintenance alerts as a result of simple parameter and trend shifts to more complex multiple parameter correlation shifts. The system modifies easily to adapt to multiple APU models across various aircraft platforms without needing any aircraft modifications.

Mimi Correa, Revima Director of Fleet Management, commented: “Revima has provided APU repair services for Air Serbia since 2014. We are proud to add value to this long-term relationship with APU Health Monitoring services. The new offering is part of our strategy to develop and extend our APU maintenance support and expertise into Health Monitoring and Fleet Management Services. Our Health Monitoring Service has proven to reduce customer overall APU operating costs by prognostically identified APU and component removals to reduce repair costs, unplanned APU maintenance and unscheduled maintenance interruptions.”

Air Serbia is Serbia’s flag carrier. The company is based out of Belgrade Nikola Tesla Airport it was founded 17 June 1927 as Aeroput and began its operations as Air Serbia in October 2013. Air Serbia operates 21 aircraft including A319, A320, A330, ATR 72-500, and Boeing 737-300.
