

## Press Release

MRO Europe, Amsterdam, October 16th, 2023

### **REVIMA extends MRO landing gear repair capabilities to its Yainville (France) site.**

**For the benefit of its customers, REVIMA has extended Landing Gear repair capabilities to its Yainville site which is located a few kilometers from its historical location in Rives-en-Seine.**

REVIMA received the green light from the airworthiness authority to extend landing gear repair capabilities to its facility in Yainville, where its Material Solutions (also known as Normandy Aero Spares) is based.

The new repair facility has been set-up according to world class standards in full alignment with Revima's culture of high-quality workmanship. The repair capability covers minor repairs and recertification to address the mid-life solutions market.

The rating currently covers A320 and A330 families and is expected to cover additional platforms in the coming months.

Olivier Legrand, **Revima Group** President & CEO, said: "The increasing demand of Mid-Life Landing gear solutions has convinced us of the necessity to create a "dedicated minor repair and recertification" shop, as our main MRO site in Normandy France enjoys significant growth for overhaul activities that leave little space and slots for such activities. These new capabilities will allow our Material Solutions business to adequately respond to associated market demands with high quality & responsive services".
